

Learning Objective:

- Compute partial derivatives of composite functions using the chain rule (including the matrix version).
- 

Key Equations:

---

Notes (3+ sentences or ideas):

---

Examples with explanations (2+):

---

Learning Objective:

- Find tangent lines and planes to a surface or space-curve at a point, and use them to linearly approximate a higher-dimensional function.
- 

Key Equations:

---

Notes (3+ sentences or ideas):

---

Examples with explanations (2+):

Learning Objective:

Other Important Concepts (at least one):

---

Key Equations:

---

Notes (3+ sentences or ideas):
