

Learning Objective:

- Compute the Unit Tangent (\vec{T}) and Unit Normal (\vec{N}) vectors of space curves
-

Key Equations:

Notes (3+ sentences or ideas):

Examples with explanations (2+):

Learning Objective:

- Find rates of change along a space curve
(\vec{v} and \vec{a} starting from $r(t)$, $v(t)$ OR $a(t)$)
-

Key Equations:

Notes (3+ sentences or ideas):

Examples with explanations (2+):

Learning Objective:

- Find the curvature (vector and value) of a space-curve or surface.
-

Key Equations:

Notes (3+ sentences or ideas):

Examples with explanations (2+):

Learning Objective:

Other Important Concepts (at least one):

Key Equations:

Notes (3+ sentences or ideas):

Examples with explanations (2+):
